

GOKHALE MEMORIAL GIRLS' COLLEGE

Best Practice VI

Green and Clean Campus

Maintenance of cleanliness and hygiene and the aesthetic value of the college campus has been one of the best practices of the college since its inception.

The college has an open space and a plantation around the space which is maintained with utmost care by NSS unit-1 and the support staff. The few trees that surround the open space add beauty and peace to the open space. They serve as a visual resource.

There is small herbal corner with a number of species of herbs and medicinal plants.

The walk-way in front of the main building is always barrier-free. Automobiles are prohibited inside the campus to maintain the air quality.

The campus is single-use plastic free.

Cleanliness and hygiene is strictly maintained in class rooms, corridors, laboratories and washrooms in both the college buildings.

There is ample provision of safe drinking water.

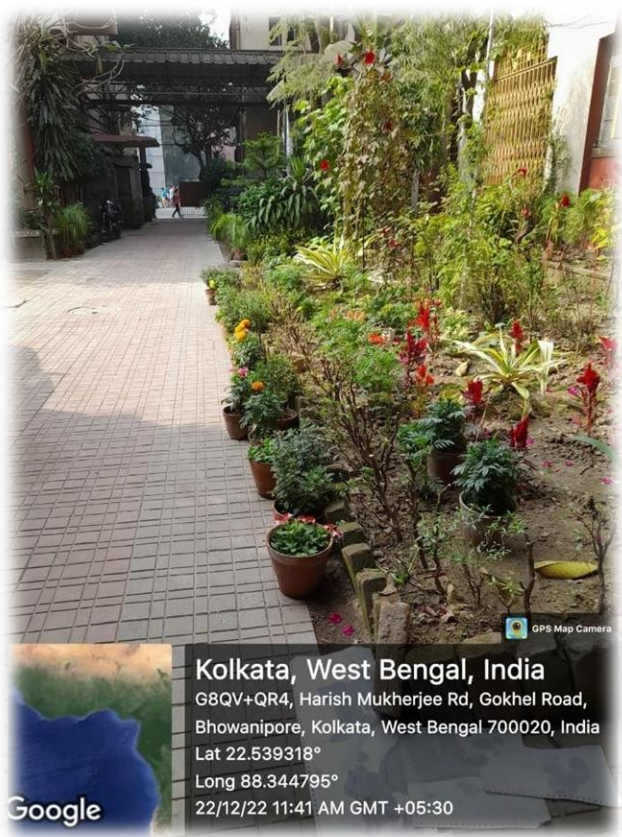

Littering is strictly prohibited. Waste bins are maintained throughout the campus and waste is duly disposed.

The support staff of the college strives to keep the campus always green and clean.

Clean and Safe Protocols in Corona Times – March 2020 Onwards

The College conscientiously followed every protocol to keep the campus free of the corona threat. Strict safety rules were particularly during Admissions 2020, during official meetings and in the conduct of office work.

Disinfection of Pathway
